

SyncUP FLEET™ HOS App Roadside Inspection

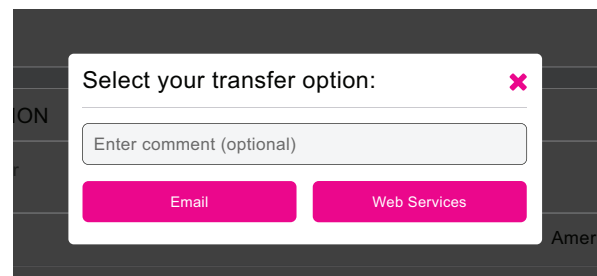

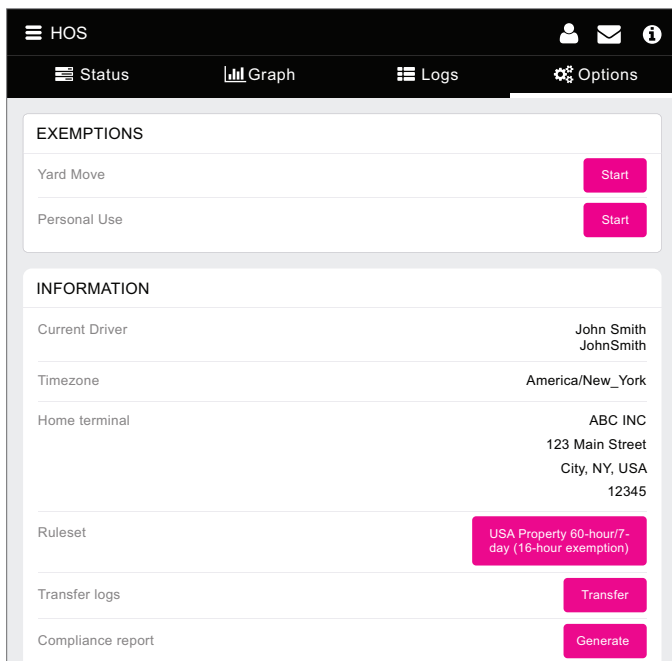

The SyncUP FLEET HOS App allows users to generate roadside inspection reports. To generate a roadside inspection report, follow these steps:

This document must be kept in the CMV at all times, and made available during a roadside inspection in accordance to §395.15 (g)(1).

Roadside Inspection

1. From the **Dashboard**, select **HOS** and the **Options** tab.
2. Scroll down to the bottom of the page and select the desired data transfer method.
3. To transfer logs via Email or Web Services, select Transfer next to Transfer logs.
4. Then choose your desired transfer option, of Email or Web Services.

5. If you are unable to use the transfer option, then use the Compliance report by pressing Generate to show your logs on the device.
