

VEHICLE COMPATIBILITY SHEET

OVERVIEW

SyncUP *FLEET* is compatible with most gas, diesel and electric vehicles on the road today. The SyncUP *FLEET* device works with the 16-pin or 9-pin port typically found underneath the vehicle dashboard. 9-pin ports, typically found on heavy-duty vehicles, will require an Adapter.

Check below to identify which port you have.

The Extension Adapter allows the device to be installed out of the way and out of sight. The T-Harness allows the vehicle port to remain open and free for use, such as for a scan tool.

T-Mobile SyncUP *FLEET* devices plug seamlessly into 16-pin ports. Extension Adapter and T-Harnesses available but not required.

For use with 9-pin ports, T-Mobile SyncUP *FLEET* devices require an Adapter.

At this time, T-Mobile SyncUP *FLEET* devices do not support 6-pin ports.

SyncUP *FLEET* supports the majority of light-duty vehicles, which have a weight less than 8,500 pounds, manufactured after 1996.

SyncUP *FLEET* supports the majority of heavy-duty vehicles, which have a weight in excess of 8,500 pounds, manufactured after 1999. Examples of heavy-duty vehicle manufacturers include:

- International
- Mack
- Freightliner
- Volvo
- Peterbilt
- Isuzu
- Kenworth
- Mitsubishi (Fuso)
- Sterling

Please call your local area direct rep to confirm your vehicle compatibility.
